## EXPERIENCE

### Software Engineer III-DevOps, Viewpoint — Portland OR

JAN 2022 - PRESENT

- Design and construct infrastructure and comprehensive CI/CD pipelines using image based methodology and Azure to facilitate the seamless delivery of multiple microservices for an integrated SAAS solution.
- Create custom unique CLI tooling for increased visibility and continued monitoring of existing applications throughout environments using GoLang software.
- Consult with management on the operational requirements and risks of software solutions and contribute expertise on information system options, risk, and operational impact.
- Mentor software developers to attain operations skills and assume responsibilities within the domain..

### Software Developer II-DevOps, Viewpoint — Portland OR

DEC 2019 - DEC 2021

- Lead DevOps engineer responsible for building infrastructure and integrating full CI/CD pipeline aimed at delivering new microservices for an integrated SAAS offering using GitHub actions and the Azure Portal.
- Sole DevOps engineer responsible to work with teams of product managers, developers and architects to transfer on-premise solutions to Cloud SAAS offerings using Azure Portal and Azure DevOps used by thousands of daily users.
- Responsible for monitoring cloud resources and implementing cost saving measures resulting in savings of over \$250K annually.
- Implement monitoring solutions for both service and infrastructure as well as added improvements to our internal tooling for increased software performance and delivery.

### Software Developer I, Viewpoint — Portland OR

APR 2018 - NOV 2019

- Work with teams of product managers, developers and architects to document and understand existing functionality of an on-premise software solution for future Cloud transfer.
- Front-End engineer tasked with creating Angular UI integration with .NET APIs for transfer of on-premise software solution to the Cloud.
